Problem Statement

Students preparing for technical interviews often face these problems

Most preparation platforms do not adapt to the candidate's resume or target role.

01

Lack of structured practice

02

Generic interview questions

03

No personalized feedback

04

Difficulty identifying weak areas

Our Solution

AI Interview Preparation Bot
We built a GenAI-powered system that:

01

Analyzes a candidate's resume

02

Extracts technical skills from the resume

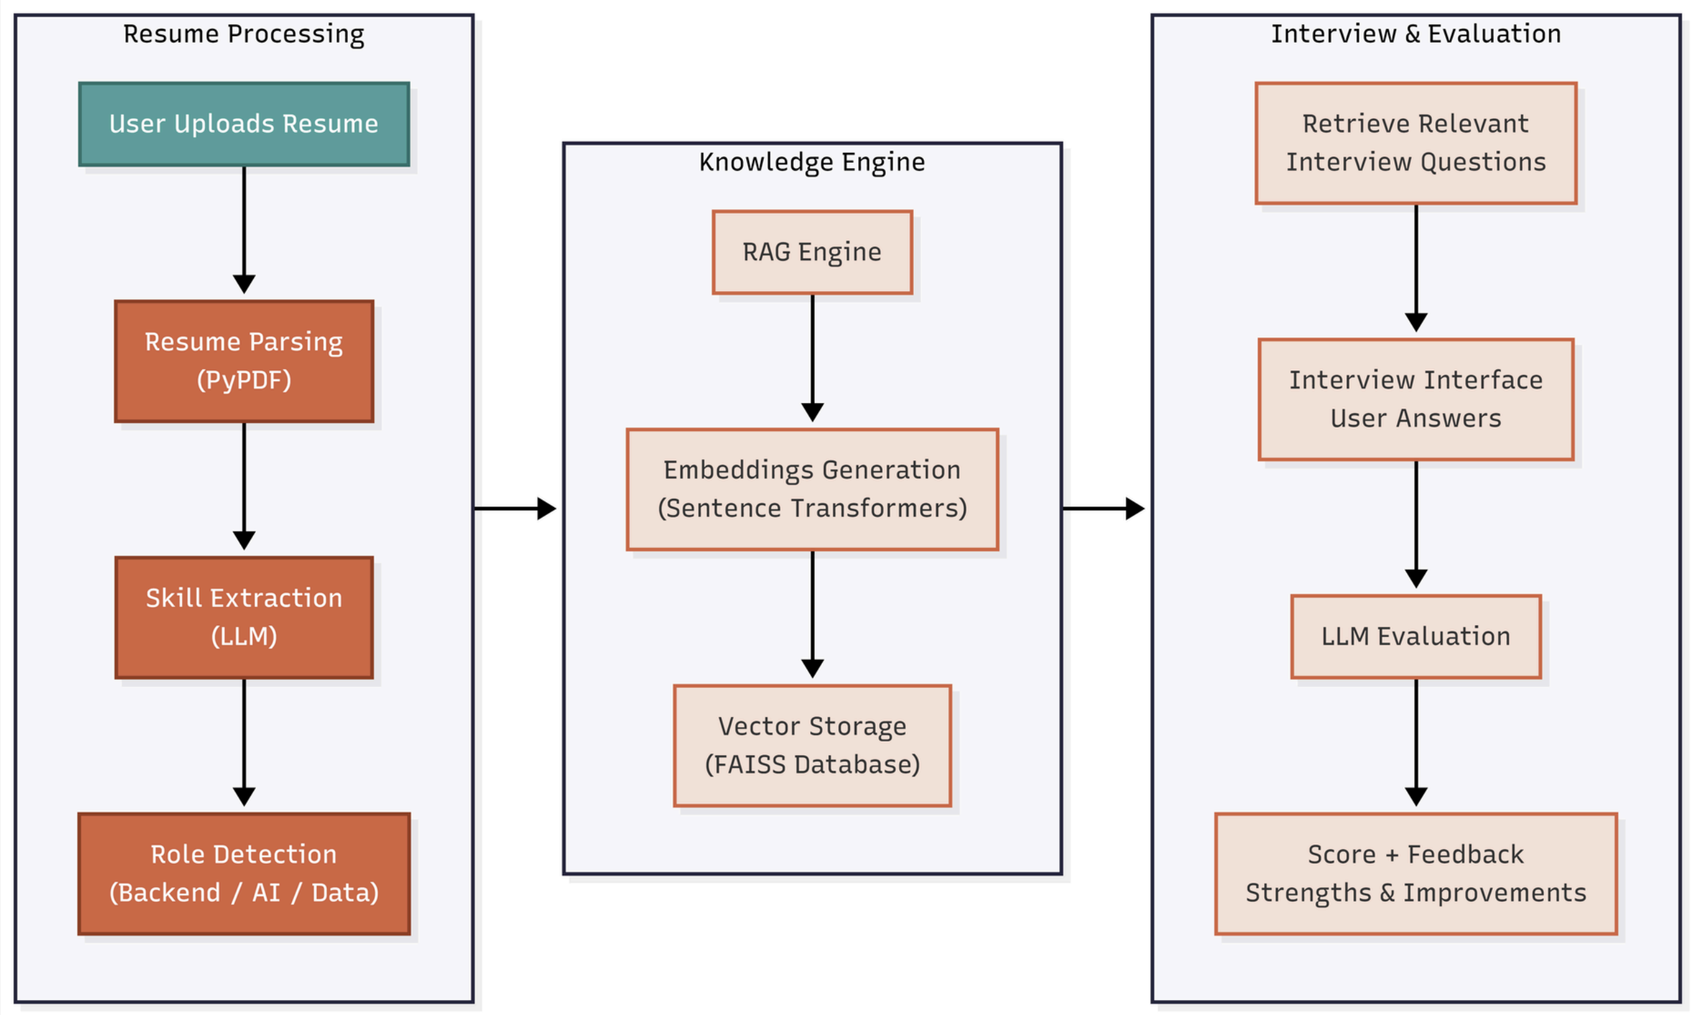
03

Retrieves relevant interview questions using RAG architecture

04

Evaluates answers using AI feedback

System Architecture



Thank you!
